

Hearing Loop Table

Featuring the HLD5 Hearing Loop Driver

PRODUCT INFORMATION

The Hearing Loop Table (Table) is an ADA compliant handcrafted Table with a built in hearing loop system. The Table houses a HLD5 Hearing Loop Driver, four hearing loop modules, and a digital mixer under the surface of the Table. Two or four flush mounted microphones are built into the surface to pick up speech and provide a complete hearing loop system for up to four people. For users with a hearing device in the T-Coil program or with use of a Contacta RX20 Loop Listener, the speech at the Table will go directly into the user's ear significantly reducing background noise. The Table produces clear sound allowing improved comprehension and communication is settings with ambient noise.

Features

- › Contacta HLD5 Hearing Loop Amplifier
- › Internal Digital Signal Processor (DSP)
- › Tables are solid Cherry wood, handcrafted in the USA
- › Option for two or four microphones

- › IEC 60118-4:2006 (in correct installations)
- › BS EN 55103-1:2009 (EMC emissions)
- › BS EN 55103-2:2009 (EMC immunity)

Applications, Accessibility, and Use

Applications	<p>The Hearing Loop Table has a modern design and sleek look that can appeal to a variety of settings, both casual and professional. The Table is shipped pre-assembled and is ready for immediate use once plugged in.</p> <p>Applications include: Home/Personal use, Audiology practices, Libraries, Workplace, Restaurants, Coffee Shops, Conference Centers, Hospitals, and Retirement Communities.</p>
Accessibility	<p>The Americans with Disabilities Act (ADA) of 1990 prohibits discrimination and ensures equal opportunity for persons with disabilities in employment, State and local government services, public accommodations, commercial facilities, and transportation. (Source: ADA.gov) The Table adheres to the enforceable accessibility standards called the 2010 ADA Standards for Accessible Design.</p>
Use	<p>The Loop Table is compatible with users who have a T-coil program in their hearing device. With training from an Audiologist, users can activate their T-coil program and no additional equipment is needed to use the Table. If a user suffers from hearing loss but does not have a hearing device, a Contacta RX20 Loop Listener can be used. The Loop Listener is a compact device that has a built in T-coil and can be used with headphones or earbuds.</p> <p>The Loop Table will come with a hearing loop sign on the table and an additional hearing loop sticker that can be posted within the venue to inform patrons of the availability of the assistive listening system.</p>
