

SS-EPTU-170

Wide Pass Through Tray with Window Intercom System

CONTACTA PASS THROUGH TRAY SYSTEMS

The SS-EPTU-170 is a wide pass through tray that allows items to be passed between the secure and public side of a security screen. The tray features three flush speakers, a rigid customer microphone and a flexible gooseneck microphone for the staff. With an integrated window intercom system, it allows for clear communication between staff and customers.
