

IL-AE97

Above the Counter Loop Aerial

CONTACTA ONE-TO-ONE LOOP SYSTEMS

The Contacta IL-AE97 Hearing Loop Sign and Built-In Aerial is designed for above-the-counter hearing loop systems, providing clear and accessible one-to-one communication for people with hearing loss.

The IL-AE97 offers two positioning options to suit a variety of counter and service-point configurations. The aerial can be mounted vertically to a surface, or attached to a stand for countertop placement.

The aerial transmits the audio signal as a magnetic field, allowing the telecoil (T-coil) in a compatible hearing aid or cochlear implant to receive the signal directly from the hearing loop driver.

Features

- › Magnetic field strength distance approximately 2.62ft

Physical Data

Dimensions	Height - 8.07" Width - 8.07" Connection cable length: 6.56ft
Weight	0.44lbs
